

**Upon these Three Main Principles**, The Humanity Party® intends to accomplish the following:

### **End Worldwide Poverty and Slavery**

Poverty exists because people lack the ability to purchase the things that would eliminate poverty. The world has changed over time. No longer can a person hunt for or gather food in a free land. Someone owns all the land upon Earth. The land is owned and controlled by a few; therefore, the majority is dependent upon the few and compelled to purchase the basic necessities of life from these few.

Money is the system of exchange and purchase that the world has established by law. Poverty exists because the majority does not have enough money to pay for their basic necessities of life.

The Humanity Party® proposes giving enough money (electronically restricted) to all people upon Earth to allow them to purchase the basic necessities of life. Upon having the funds to purchase these things, the demand for these things will rise exponentially. The supply of these things will naturally follow through the established free market economic system. Supplying the needs of the demand will create jobs and employment opportunities that did not exist before the demand was created.

### **A New One World Government and Constitution**

Most countries of the world consist of human beings from all ethnic backgrounds and cultures. Immigration throughout Earth has created a melting pot of humanity. Few nations exist independently restricted to one ethnicity or culture. All nations of Earth have become economically dependent on each other. Advances in technology and transport have created an economic situation where one nation cannot remain economically sovereign. When a separate

sovereign government creates trade laws, establishes tariffs and fees, and in other ways attempts to control international markets for its own sake, all other nations suffer from these selfish controls.

It is time for the people of Earth to consider a One World Government that derives its powers from just one Constitution. Wars would stop because a One World Government would not be forced to defend itself against another government. The threat of nuclear war would all but disappear. Economic prosperity and equal opportunity for all people would flourish and be controlled by the people who elect this government.

### **The Humanity Party®**

The Humanity Party® exists for the sake of all of humanity upon planet Earth. Without its solutions, the world will continue on a slippery slope to terrorism, unrest, wars, and human suffering. We must admit our mistakes. We must realize that WE created the problems that we are experiencing. And if WE created them, WE can also solve them. But nothing will be solved until we unite as One People, Indivisible, With Liberty and Justice for All.

The Humanity Party® is the only movement that has ever existed that has proposed the things incorporated into this platform. THumP® has the solutions. No one else does®.

## **THE HUMANITY PARTY®**

Five Basic Necessities of Life

**Introducing** a new political party that offers hope for our future with realistic alternatives to the existing government systems. In a world full of uncertainty and turmoil, we can create peace.

The **Humanity Party®** (THumP®) proposes real life solutions to real problems for people living in America and throughout the world today. Our platform is simple, straightforward, and easy to understand.

We believe that all people should have the Five Basic Necessities of Life, provided free of charge. We already have the technology and the resources to make this a reality today.

How will we pay for these social programs? Read more about The Humanity Party®'s Fair Tax Plan.

The change we need can be implemented through the proper constitution. Our proposed Constitution is a general outline of desired changes that can be incorporated into the current U.S. Constitution.

The Humanity Party® is a legally registered U.S. political party. Until we have candidates from our party, THumP® calls for a civil uprising demanding real change of the political status quo. This can be done peacefully and according to law at voting booths throughout the world. Instead of voting for any listed candidate, write in "HUMANITY PARTY."

## **What is the overall end that THuMP® is trying to accomplish?**

**NO ONE** would ever go hungry.

**NO ONE** would ever have to stay in an abusive or miserable relationship because they couldn't afford to leave.

**NOBODY** would have to give up everything they've ever worked for or file bankruptcy in order to qualify to receive healthcare for a life-threatening illness.

**NO PARENT** would ever have to go to bed worrying about how they will feed their children the next day.

**NO PERSON** would ever have to be humiliated, frustrated, or discouraged by the process required to receive any kind of help from the government.

**NO INDIVIDUAL** would ever have to take a degrading job with a miserable boss, working awful hours just trying to pay for the bare minimum of surviving.

**ALL PEOPLE EVERYWHERE** would have access to as much healthy food as they desire.

**EVERYONE** would be provided with the proper medical, mental, and dental care that they need.

**EVERY PERSON** would be free to live wherever they wanted, in whatever circumstances, alone, with a partner or friends, or however they wanted in a safe and secure home.

**EVERY CHILD** would feel the peace that comes from parents who are confident in their ability to raise their children without the pressures of providing for their basic needs.

**EACH AND EVERY PERSON** would be able to get the education they desire and contribute to society in whatever way brought them the most joy.

**EACH AND EVERY PERSON** would have the right to be as rich as they want to be.

**EACH AND EVERY PERSON** would have the right to do whatever they please, as long as it did not violate or impede the free will of another.

## **A BRIEF OVERVIEW OF THE HUMANITY PARTY®'S POLITICAL PLATFORM**

**The Humanity Party® bases its political platform upon three main principles.** These principles ensure the establishment of the only government that can and will serve the people properly and protect their freedom. The most important aspect of these principles is to provide a blueprint for the establishment of laws that support equality for all people.

**A Congress** elected by the voice of the people shall use these **three main principles** as a guide in writing a new Constitution that establishes particular inalienable rights equally applied to all people. After the establishment of a new Constitution, Congress shall then establish sub-laws and sub-principles, which are set forth to assure the adherence to these **three main principles**.

### **I. Government Exists For the Benefit Of the People**

The **First Principle** is that this government shall never be self-serving; or in other words, it shall never act in and of itself and of its own accord for the sake of its own existence.

The Constitution must be written to such form as to restrict the government to ensure that it abides by this First Principle and law. A government should only exist to serve those who benefit from

its existence; and those who benefit from its existence are those who give it its power and authority—the people.

### **II. Government Exists To Protect Individual Free Will**

**The Second Principle** is that this government will guarantee the freedom, or the **free agency**, of all those whom it serves. And this free agency that it guarantees should restrict those whom it serves from infringing on the free agency of another, or from having another infringe upon the free agency of those whom it serves. Government should not be allowed to infringe upon the individual free agency of the people whom it serves, except in defending the free agency of another from being violated.

### **III. Government Exists To Support and Protect Life**

**The Third Principle** of government is that it shall provide the means whereby those whom it serves may have an equal opportunity to experience the happiness each person desires, as long as that desire is consistent with the **Second Principle** of government regarding personal free agency.

**Because it was not an individual's free-willed choice to exist, government must be compelled to provide those things that are necessary to live.** Each person should be guaranteed the opportunity to fulfill the measure and purpose of their involuntary creation, which purpose is their individual happiness in conjunction with the **Second Principle**.

Although government should provide the means whereby the people are supported in life, it cannot compel them to use those things that it provides for them. If government were to compel them in any of these things, then it would break the Second Principle by which it is established.
